Minolta X500 Manual

Film Camera Review: Minolta X-500 35mm MF SLR Film Camera 'An often overlooked manual focus autoexposure 35mm SLR film camera with advanced features' Introduction and Overview Often overlooked by photo enthusiasts who were overawed by the capability of the X-700, the lower-priced X-500 may actually be a better camera for those who prefer to shoot in aperture priority or in full manual mode.

Minolta X-500 - ImagingPixel

As always Minolta introduced a simpler '5-line' besides their advanced '7-line' in 1983. However in this case one can doubt if the X-500 is really a simpler model. True it does without the programmed exposure of the X-700. But without the later common program shift wheel, the X-700 in P mode is no more than a point-and-shoot.

Minolta launched their enormously successful X series of cameras in 1981 with the top of the range X-700. This camera feature multi-mode operation (with aperture priority, manual and programmed exposure modes), a sophisticated through-the-lens flash metering system and the ability to take the 3.5 fps Minolta Motor Drive 1.

Minolta X-500 - Classic cameras - Christopher J Osborne

The Minolta X-570 was released in April 1983, two years after the X-700 and was sold as a less expensive alternative to that award winning and very popular camera. Sold as the X-500 in Europe and Asia, and the X-570 in the US market, it never gained the popularity of the X-700 and is still under-rated by many.

The Minolta X-600 SF is a manual focus 35mm SLR, which uses the Minolta SR mount. It was released at the same time as the Minolta X-500, in April 1983. While both cameras use manual focusing, the X-600 differs from the X-500 in that it offers a focus confirmation feature. This feature was called "Speed Focus" by Minolta, hence the "SF" badge on the front of the camera.

Introduction [edit | edit source]. The Minolta X-300 is a 35mm manual focus SLR using the SR lens mount (often wrongly referred to as the MC or MD mount, which were actually lens series) which was used on all Minolta manual focus 35mm SLR bodies (except for the Minolta ER) beginning in 1958. The X-300 is based on the earlier X-570 but had features removed by Minolta to reduce the price tag.

The general demise of the manual focus SLR, post-1985, also contributed to Minolta's not wanting to invest any more in the quality of X-700 and X-370/-300 (the two remaining MF Minolta bodies) components as they would much rather sell you a shiny new auto focus (AF) SLR and a batch of Alpha/Maxxum lenses to go with it ;-).

Minolta Capacitors - 678 Vintage Cameras

The X700 is usually recommended from the range of early 1980s Minolta SLR's. Understandably because it was the top of the range, with program mode as well as aperture priority and manual. Sometimes the X500 (also called the X570) gets a look in but rarely is the Minolta X300 (or X370) mentioned.
